SANTA FE, NM - The New Mexico Department of Health, in partnership with the New Mexico Immunization Program announce the launch of *VaxViewNM*, a new public portal for the New Mexico Statewide Immunization Information System. For the first time, parents and guardians will have access to official immunization records.

The website, vaxviewnm.org, allows families to see, save and print their child's immunization records without a doctor's office visit. It eliminates the need to carry multiple or outdated documents. The portal is accessible on both desktops and mobile devices.

First time visitors will be required to enter initial information such as patient name, date of birth, gender, their relationship to the patient and contact information. The user will then request a validation code via text messaging or email. After receiving and entering the validation code, the immunization record will open in a new window.

The secure portal uses a two-factor authentication via text messaging or email to validate the patient, parent, or guardian's identity before allowing access. After three unsuccessful attempts to find the immunization record, the system will lock the user out for 30 minutes.

For more information on VaxViewNM, contact the NMSIIS help desk at (833) 882-6454 or (505) 827-2356.
