PART 7 IN A SERIES

CHAPTER SEVEN – BE CAREFUL WHAT YOU SAY, THINK AND WISH FOR

POLITICAL CORRECTNESS

A scheme of social engineering. Political correctness is the politically correct term for Cultural Marxism, a systematic method to punish dissent and to stigmatize social heresy. Its trademark is intolerance, classifying its adversaries as haters, or mentally ill. PC for short (or BS), it means conforming to a particular sociopolitical ideology or point of view, such as a liberal's promotion of tolerance thru intolerance. As the new age bully, PC can be any true statement that has been transformed into a lie to control or mislead the weak minded or used as a weapon of intimidation to silence any and all criticism of a leftist authoritarian political agenda … PC is also the modus operandi for revisionist history.

TRIGGER WARNING: A phrase posted at the beginning of various posts, articles, or blogs. Its purpose is to warn weak minded people who are easily offended that they might find what is being posted offensive in some way due to its content.

Trigger Warning… Politically incorrect definition of political correctness – 'A term used for whiny overly sensitive pansies who need everything sugar-coated for them.'

POLITICAL INCORRECTNESS: For the most part, factually correct.

CULTURAL MARXISM: The fundamental transformation of society by subversion of Western culture to create a society fully dependent on government. For cultural Marxists, no cause ranks higher than the breakdown of the nuclear family, which they despise as a dictatorship and the incubator of sexism and social injustice.

NUCLEAR FAMILY (traditional): A family unit that includes two married parents of opposite genders and their biological or adopted children living in the same residence. It is historically the foundation of society.

SOCIAL/CULTURAL ENGINEERING: Cultural transformation by forceful and coercive government intervention into society and family life so as to bind people into a ‘better’ existence. Familiar examples include dictating our food choices, affirmative action, mandatory recycling, demonizing smokers and micromanaging personal energy consumption.

WUSSIFICATION: To wussify is to make weak and ineffectual. Wussification is the systematic sissifying of men or women, afraid to speak up, afraid to take charge, trending to an increasingly wimpy society. Political correctness is the leading edge of the wussification of America. If members of every possible subgroup in American society are too delicate to survive being joked about, then we have become a nation of wusses, afraid of our own shadows. Related to this is the trend of helicopter parenting replacing traditional free range parenting despite crime rates continuing to decline. The dramatic rise in broken homes is another source.

INTELLECTUAL DIVERSITY: Diversity of ideas which are virtually forbidden on campus, mainstream media and public institutions due to conflicts with the abject conformity required by political correctness.

LANGUAGE ACTIVISM aka LANGUAGE POLICE: Imposition of a ‘correct’ political language by creating new words (Hispanic, sexism, victimization, social justice), or redefining words (discrimination, diversity, budget cuts) with the goals of deconstructing American culture and producing socialist ways of thinking and behaving.

SHAMING: Historically, public derision and stigmatization of those engaging in culturally taboo activities, usually to modify behavior by inducing guilt or to assign blame. The term that sparked the current surge, ‘slut-shaming’ goes back millennia as a preventive measure to the breakdown of the nuclear family and society as well as STD prevention. ‘Fat-shaming’ is a politically incorrect contemporary method of reducing obese people’s excessive health care costs which are paid for by healthy people… Nowadays anyone who is slightly insensitive or not PC enough can be led to a public character lynching (shaming) without due process. What a shame.

PC PHOBIA MISNOMERS: A phobia is an irrational fear of something. Judging the behavior and character of individuals and cultures is rational and normal. Disapproving of promiscuous cultures as well as intolerant violent religions is totally rational and has little to do with fear. Homophobic and Islamophobic labels are examples of politically correct deceptive terms used to confuse the issue and control the debate.

MICROAGGRESSIONS: Acts or words that are perceived to be insulting by a person who is looking to be insulted, whether or not that was the intent of the transgressor. Usually a symptom of a persecution complex.

SEXUAL HARASSMENT: The accusation when heterosexual men try ‘coming out’ by discussing their sexual orientation with women in the workplace.

COMING OUT (of the closet): When homosexuals ‘come out’ or discuss their sexual preferences in the workplace it is considered a courageous act.

BIGOTRY: Intolerance of ideas, opinions, or beliefs that differ from one’s own, and intolerant of the people who hold them. Indeed for some, even judging content of character is considered bigotry.

THE TOLERANCE PARADOX: Arises when a tolerant person holds antagonistic views toward intolerance, and hence is intolerant of it.
