

Last week is in the past. This week expect to slow down. A New Moon emerges on April 27. This marks a quiet and restful time for quiet contemplation. Use your time wisely. Meditate on past behavior and how you can improve. Don't dwell on your mistakes. Your best bet is to make a list of your top areas for improvement. Madame G says think and take action! GO!

Aries (March 21-April 19)

Life is full of adventure and inaction. Everyone is on the verge of waiting for something to happen and the moment of action. In the quiet moment between action and choosing—reflection is king. Learn to use those quiet moments for understanding and acceptance. You must learn to live with what you can't or won't change. You may change the rest. There you'll find happiness.

Taurus (April 20-May 20)

You're heading in a direction that may or may not be good. It may encompass everything you think you want. Is it? Now is the time for thinking things through. Don't accept a life other's have chosen for you. You will live and die with your mistakes and regrets. Living with this disappointment is on you. Be brave! Live strong. And be true to yourself.

Gemini (May 21-June 20)

You've challenged yourself and maybe you failed. Don't despair. In fact, this is a good thing. The worst thing you can do is succeed all of your life. You need the challenge of failure to push you forward—to improve—and be the best you can be. All you need is a little hope. You can improve. If you put your mind to it—you will improve. Stop moping. Start doing. NOW go!

Cancer (June 21-July 22)

Don't be afraid to take a chance on something new. Bravery involves more than taking on dragons or leaving the house. It's about emotional vulnerability. In a twist of irony, those who show honest emotion are more courageous than those who hide behind cynicism and anger. You're a true warrior. Take a moment for solitude and show them what you're made of.

Leo (July 23-Aug. 22)

The quiet lion takes a stroll and discovers a herd of deer. This wealth of knowledge feeds the family during hard times. Don't be afraid to listen to your inner monologue while quieting the inner drum. It's in that moment, you may discover what you've always needed to know—in the way you've always needed to see it. Seek and ye' shall find. Go forth!

Virgo (Aug. 23-Sept. 22)

The truth is out there. What answers do you seek? Remember, the answer is worthless without the proper question. You must dig deep and unravel what you think you know. Truth resides somewhere between the known and unknown. It's on you to reach that moment of peace and ecstasy. Take a moment and test your inner strength. Your will—will take you there. You can!

Libra (Sept. 23-Oct.22)

You're ready for the next step. What is it? Maybe it's your romantic relationship or career. You're the master craftsman of your life. It's on you how this story goes and what's worth fighting for or leaving behind. Take time to think through your desires and scrap the excess. You may feel the twinge of regret at losing out, but you'll gain so much more. Live your life, well.

Scorpio (Oct. 23-Nov. 21)

Toss out superfluous goals. You'll never find satisfaction quite like mastery over your craft. Regrets will not lead to practice. Take time to think through what you want carefully. Plot your goals and plan how to get there. The jack-of-all trades has fun and yet lacks the refined sense of accomplishment that comes with careful study. Who do you want to be?

Sagittarius (Nov. 22-Dec. 21)

You've suffered a disappointment. That sucks! So, get over it. Nothing quite repairs the heart like moving onward and forward. This sounds cruel. Madame G isn't sorry. Stop wasting time on what will never be. You have options. You have the ability. Your heart is capable of more. You're a strong and beautiful human being who is capable of more. Never give up!

Capricorn (Dec. 22-Jan. 19)

Your heart's in the right place. Don't forget to consider the cost. If you do something, give freely of yourself and expect nothing in return. You don't need to prove yourself to anyone, except for you. If you're living the life you want then you're doing great. Don't live by anybody else's standards. Only you know what's worth it. Only you know what's good enough. It's your life.

Aquarius (Jan. 20-Feb. 18)

Live it! You know your options. You know what needs to happen. Only you can make the choice to be happy or not. This is the best time to think things through. Go the extra mile. And write about it. You must document these changes for yourself. Show yourself that you're capable of moving onward. The only critic you have is you. You're the only one who can stop.

You might be in for a grand surprise. Only it may not be that grand. People have a way of erecting revolutions with little more than an underground network. You may think you're entitled to the latest promotion or award. That doesn't make it true. Remember, always get it in writing. Don't leave it to chance and hope for the best. You'll regret it if you do. Good luck!
