

The Sun is firmly in Gemini and today Venus conjuncts Uranus. You may feel, as if you have ants in your pants. The urge to move and wander may very well be overpowering. It'll settle down on Sunday (a little). Madame recommends that you get outside and enjoy the pre-summer breeze. Take this time to enjoy yourself and spend time with the pets and family. Go for it!

Aries (March 21-April 19)

You're ready to get the show on the road. You can't see into the future, but you're ready for a wild ride. Take this moment to enjoy the moment. Rest. Relax. You may find it necessary to study a new book or take up a constructive hobby. Consider learning a new language. It never hurts to learn Chinese, Russian, or ancient Greek. Who knows when you'll need it. Try it!

Taurus (April 20-May 20)

Your hands are full. You've got plans over here and over there. You may run a little thin. Others may start to doubt your ability to handle it all. In fact, you should doubt this too! No one is a machine—not even you. So, hire some help. Do you need to find a baby sitter? Maybe you need a wedding planner or just little help here and there. Look around and make the way. Will it!

Gemini (May 21-June 20)

Consider taking some time off this month. You may need a personal day soon. This is not uncommon during this lovely time of year. You feel the pull of the open and wild air. Instead of forcing yourself within the confines of a limited space, why not go outside. Even if you only take a break for five minutes per day—allow yourself to escape. You'll be so glad you did. Do it!

Cancer (June 21-July 22)

Life is all about taking chances. If you're ready to start on the next adventure, try dipping your toe in first. You may learn that you enjoy it, more than you thought. On the other hand, you may just need to jump in. You can over think the problem that may lead to your talking yourself out of it. Stop trying to make it perfect and take action. Now is the time. Just go!

Leo (July 23-Aug. 22)

Ready for an adventure? If you live the kind of life you don't need a vacation from—you're doing it right! If you need help in the other direction, you may want to re-think things. Instead take time for family and loved ones. Spend time outside. Take the dogs for a walk and let them chase each other's tails. You'll enjoy the show and have fun. Enjoy!

Virgo (Aug. 23-Sept. 22)

Are you about to spring a leak? Maybe you're tired or just ready for some new scenery. If everybody you know is pissing you off, don't worry. It's this time of year. We'd all rather be outside enjoying the sun rather than sitting shackled to a chair. Don't worry too much if you can't take immediate action—this too shall pass. The right path will become clear soon.

Libra (Sept. 23-Oct.22)

What's a Libra to do? Instead of relying one source of information, begin looking for more. You're headed on the right path even if it's covered in clothes. Pull up your sleeves and start cracking away at tidying. You'll be amazed by what you discover about yourself and others. Now is the time to rejoice in your life. Remember, it's better late than never.

Scorpio (Oct. 23-Nov. 21)

Sometimes, the best type of action is inaction. You can rush a project to ruin. This is not to say that you shouldn't take action at times. But, other times you really need to sit patiently with yourself and others. Listen to your heart. What is it telling you? Your spirit will speak openly once you listen with an open mind. There is nothing you can't accomplish. Just be!

Sagittarius (Nov. 22-Dec. 21)

You're on a mission—of destruction. It's personal. In that you're destroying yourself. How? No one knows, it's a secret with yourself. You may sabotage a work opportunity or quit a job before you really get a chance to delve deeper. Whatever the case, don't look back. You've made mistakes but, you can move forward. Onward and upward. Never give up. GO!

Capricorn (Dec. 22-Jan. 19)

It's amazing how much things change and really stay the same. People and places that seem to change or improve, really only end up spinning their wheels and not moving forward. This may spin you around and make you feel dizzy. If that's the case, stop! Look around what do you really see. Before you confront the crowd—look within. Don't change others. Change yourself.

Aquarius (Jan. 20-Feb. 18)

Your life mission is opening up. Are you afraid? Yes? Do you accept? Yes! You can't back away from your purpose. Don't allow your own fears or insecurities to frighten you. The actual product may be less than you can imagine. Keep imagining. Keep dreaming. Make the dream the biggest you can. Then try to recreate it. If it falls short, you're farther than you would have been.

Pisces (Feb. 19-March 20)

You may find yourself taking a little turn. You never know what's around the corner or who you'll find there. Not all is as it seems. Your heart keeps looking forward for people of interest. Your head keeps betraying you. Stop looking for the "one" in every person you see. Your desperation is killing you. You're enough within. You're enough! Look within. It's you.
