

***The Sun enters Leo on July 22 along with a New Moon. Take this time to rest and relax. You may want to think, read, reflect—because you're about to hit the slopes. Don't think about the future or worry about the past take it all in stride. Change is in the wind. This is a good thing. Madame G suggests you sleep because new adventures are around the corner. Peace!***

***Aries*** (March 21-April 19)

Way to go! You're heading on a new journey. Before you take off on a 2K mile journey, get some much-needed R&R. You're entitled. Don't worry the wait won't kill you. In fact, delve deep and start that research. Get all the facts and figures before you tackle the next segment. You're on the right path. The next journey will be a blast, but a little preparation is in order.

***Taurus*** (April 20-May 20)

You can do this! Whatever it is don't give up on yourself. It may seem like the world is against you on this one. Your friends may not believe in you. Heck! Your family may give up on you. But, have no fear! This is what separates the women from the crybabies. You're more than enough and more than capable. So, stop moping and get out there and do it. Ready? GO!

***Gemini*** (May 21-June 20)

Your heart's not really in this one. You may want to stop and ask why. Instead of charging forward and forcing a connection. Stop and think. What do you really want? Who are you really? These are the important questions and only you can answer them. This isn't the time for sentimentality. In your own heart, ask what do I want? There's no easy way out.

***Cancer*** (June 21-July 22)

Come on, give it a go! Don't let that doubt and insecurity get you down. You may find that you're not as "good" as you thought you were. You may find that you have a lot to learn. You may even discover you still have some learning to do. This is a good thing. Congratulations! You don't know it all. That means there's still much to do. Go forth and prosper.

### **Leo** (July 23-Aug. 22)

Your time in the Sun has come. You're shining brighter than a star and outing the sun. You can do a lot with that smile. Your heart's in the right place and your family will thank you for the effort. Take a lost soul under your wing and gain a friend and even a son. This may be the time for making positive change and living the life you've always wanted. Way to go!

### **Virgo** (Aug. 23-Sept. 22)

You've a lot of work ahead of you. Don't despair and don't give up. Work doesn't always have to be boring or a sense of drudgery. In fact, you can invigorate the stalest positions by taking charge of your life. Maybe you should clean up your workspace or reorganize your wardrobe. You may even decide that a little Secret Santa in July is in order. Who knew! Give back.

### **Libra** (Sept. 23-Oct.22)

It's a hard-knock life for a pessimist and hard charger. You may feel that life is good and then one day you're heading down the plane of oblivion. How did you get here? Consider that you may need to slow down and rest. This will ensure that you're capable of so much more than you thought. This is the time for thinking and resting. Give up the phone for a moment and listen to your heart. You may be surprised by what you find out. You're doing the right thing. Go you.

### **Scorpio** (Oct. 23-Nov. 21)

What's in store for you? No one knows. You're not blindly guided by fate. You're always one to

give destiny a little push in the right direction. You'll wait patiently for the right opportunity and bide your time. This is the best time for re-thinking your life. This is the time for considering all your options. For the true moment of action will come and then you must spring. Patience!

***Sagittarius*** (Nov. 22-Dec. 21)

You're on a road of self-destruction. But, you like it like that. A little risk is okay—if you're doing it in a conscious fashion. Even professional athletes realize the risk they take. They act accordingly. You may want to consider for a moment—the consequences of your actions. Your life rarely affects just one person—consider those around you. They may need you.

***Capricorn*** (Dec. 22-Jan. 19)

Your heart is ready for the next step. What is it? Are you heading towards retirement? Maybe you're heading towards a new job, career, or life change. This is all speculation until you take action. For the moment think on your options. Are you ready for one move or the next? It's never a safe bet. Everything has a little risk. You may mitigate this with the right action. GO!

***Aquarius*** (Jan. 20-Feb. 18)

Love is all you need. You need to think about what that means. Don't throw your life away on fantasy. You should follow your passion, but stop to think. If you love surfing with all your heart—you need to move to Hawaii, Australia, or California. You can't stay in the high desert. If you can't leave—maybe you don't love surfing enough or you know whatever it is. Think.

***Pisces*** (Feb. 19-March 20)

Adventure never really means what you think it means. You might believe that life is all about doing what you want. But, maybe it's about accomplishing what you're capable of. If you start out in a new job with no direction—consider the consequences. Maybe it's not all what it seems to be. Caution! This way monsters be.
