

Aries (March 21-April 19)

School has started and your off to the races. Maybe you finally got the kids out of the house or got started on your own education path. Whatever the case, give it all you've got. Hit the books and start studying. Don't get lost or trapped in the fear of what you don't know. Consider your assets and best qualities and apply those tricks to the task at hand. Focus on what you do well.

Taurus (April 20-May 20)

Feeling a little mutinous? Maybe you're headed towards a breakdown or maybe you should dust off your dancing shoes. Don't focus on what everyone else is doing and what you're not doing. This is the time to realize deep down that you can do anything. So, stop the self-pity train. Skip the part where you wallow in self-hatred and get out there and do it. You can't do unless you try.

Gemini (May 21-June 20)

You're on to something. Is it fabulous? It might be crazy dangerous or more than you've ever allowed yourself to imagine. Well, don't give up now! You need answers. Is this your destiny or not? Only you know and only you can find out. Madame G suggests you get all the positive vibes and feelings and focus them in one direction. Now move soldier! Your future awaits.

Cancer (June 21-July 22)

Well, that was interesting. You may have found that you don't have all the answers. It might even prove true that you know nothing at all. That's all well and good for Socrates, but this modern life needs a little more definition than that. Madame G has you covered. You really do know nothing. Congratulations! The learning may now commence. GO!

Leo (July 23-Aug. 22)

Feeling beat up? Is that the Universe trying to tell you something? If you don't listen to the signs mother nature has a way of making you learn. Even if that means knocking you off a ladder. Perhaps this is the time for resting up and letting the muscles heal. What's the rush? Do you have some exciting plans no one else knows about? Slow down. Drink some tea.

Virgo (Aug. 23-Sept. 22)

The Sun is in your sign this month. What the other Zodiac signs don't realize is that a Virgo could take over the world quickly, if only they didn't have to avoid stepping on any cracks. It's not that you're OCD—you're meticulous. And you notice everything when working on a project. This makes you a force of nature like a hurricane. Beware! Don't get lost among the weeds.

Libra (Sept. 23-Oct.22)

You're channeling the inner spirit of Virgo and focusing on what you can control. That's excellent. Look at how you can improve yourself on a daily basis. Carefully set goals and achieve them. Remember that man or woman is not an island. If you're looking to improve yourself, look out for those who also require help. Achieve more by giving more.

Scorpio (Oct. 23-Nov. 21)

Look deep inside and determine what you want. Take that first step of a 1000 by putting one foot in front of the other. Don't hesitate to keep going and look ahead never back. You may not have all the answers or see the future, but that doesn't mean you can't have confidences. Your diligent and self-motivated. The only way forward is by taking a breath and getting off the couch.

Sagittarius (Nov. 22-Dec. 21)

Did you take the first step? You're heading out on the right path. You've got a destination in mind and it's a good one. You don't have all the answers and it seems like the end of nowhere. But, that doesn't mean you can't get where you want to go by looking for yourself in each action you take. Your job may not be all its cut out to be but it's better than nothing.

Capricorn (Dec. 22-Jan. 19)

Don't be afraid—that's for the birds. You're a human being capable of more than you'll ever know. Stop looking for the easy answers. There is no lottery ticket to save you from yourself. So, stop wasting time and live the life you've always wanted. Be who you've always wanted. It's never too late in this life, to be who you've always meant to be. Live it up!

Aquarius (Jan. 20-Feb. 18)

Who's got your nose? If you're a baby, this makes sense. If you're an adult, this might mean—someone tricked you. That's okay. It's never a crime to trust someone or to give a second chance to those who've truly asked for forgiveness. However, at some point they may not really be sorry. You may need to stop and ask yourself—do they really care? You're worthy of love.

Pisces (Feb. 19-March 20)

The world will not appreciate your success. They will not applaud your efforts or teach you how to succeed. But, you may find someone or a couple of someone(s) who will teach you how to honor yourself. This is the trick of life. You may need to kiss a few toads in order to find your prince. Madame G recommends that you at least try before you buy a house full of cats.
