

***Welcome a Full Moon in Taurus on Nov. 4. With the Sun in Scorpio, this should make for a few fun surprises. Taurus will lend a steadying influence to the radically transformative, passionate, and slightly dramatic Scorpio energy. You may appreciate the calm circle surrounding the chaotic center. Madame G recommends meditation and levitation of the thoughts. Don't get stuck in rut reach towards the heavens.***

### **Aries** (March 21-April 19)

As transformations go, this is a positive one. You're heading towards your higher purpose and valuing the attainable. You may experience peace in knowing that you want what you have. This really is the heart of wisdom and the end of strife. When you stop looking outside of yourself for the source of meaning and happiness—you'll know that you've found your center. Madame G wishes you well. You deserve it.

### **Taurus** (April 20-May 20)

You're in demand. You may notice a little drain in your personal energies as others cling to your calming spirit. Don't be alarmed. This speaks to your incredible ability to heal and assist others. It's important to have self-care though, and don't let yourself get too drained. You can't help others if you have nothing left. Take care of yourself this week. Have fun. Take the dogs for a walk. Enjoy nature!

### **Gemini** (May 21-June 20)

It could take a turn for the worse and it might not. You'll never really know unless you try. Instead of reaching for the panic button and overreacting, consider taking a deep breath. Calm yourself down. For one moment, consider the worst possible situation. How would you plan for it? Write it down. Take another breath. How would you plan for the best outcome? Write it down.

You're welcome.

### **Cancer** (June 21-July 22)

This is the story of our lives. In fact, the stories we tell ourselves become our history. They aren't always true. Our minds and memories are as fallible as Velcro—they work great, until they don't. Don't let this get you down. Start working with the idea that maybe not all your memories are accurate. If this was true, how would you re-write your story? How would you re-write your version of a new you? Why not?

### **Leo** (July 23-Aug. 22)

You're as strong and powerful as the North wind. You have energy and strength, but you must enjoy your hard work. The strong North wind disrupts and usually results in some major storms. Good for you! Now, enjoy a little R&R. Consider trying something new. What have you always wanted to do? Have you read a great book lately? If not, why not? Only you know what's hidden underneath those pages. Go exploring.

### **Virgo** (Aug. 23-Sept. 22)

What's it all about? If you've been heading off on a new adventure, now is a good time to think on what you're doing. If you only head down one path, you'll only get the same results. Sometimes you must look from side-to-side in order to discover what truly is available. You may find that the tried and true path isn't nearly as bad as you think either. You'll never know unless you try.

### **Libra** (Sept. 23-Oct.22)

A journey usually begins with the first step. But, the experienced explorer knows that the best adventures require a little planning. You don't want to head off into the desert without water or

Everest without the proper warming layers and training because the lack of planning could kill you. Don't get stuck in this trap. Life is one heck of an adventure, but sometimes it requires a little planning ahead. Think ahead!

### **Scorpio** (Oct. 23-Nov. 21)

Don't despair Scorpio! Your life is always in a constant state of transformation. This is beautiful. And terrible. You have a great burden. Your senses are off the charts and your ability to create is legendary. Passion drives and whips you forward. At least life is never boring. Try sleeping on it before you take action. Madame G recommends that you practice self-care and get some exercise. Make a plan then act.

### **Sagittarius** (Nov. 22-Dec. 21)

So this is life. You're mildly amused. In the end, this is the life you've chosen because you keep making decisions. Do your best to live the best life you can. Don't take others for granted. Don't lose sight of your dreams whatever they are, no matter how small or bold they seem. You'll have no one else to blame except for yourself, if you fail to become what you've always wanted. Keep trying. GO!

### **Capricorn** (Dec. 22-Jan. 19)

Fear doesn't become you. This is the way of the world. This is the life of men and women. You have a choice. Act with courage and speak up even when your voice shakes or live in fear among the worms. In the end, we all will pass from this mortal coil. What's your legacy? In this world, how do you want others to hear you roar? You'll have no one to blame except yourself, if you don't choose wisely.

You can't keep running from the truth. Your soul requires greatness, yet your mind enjoys reality TV. This isn't mutually exclusive. Seek balance. On Twitter, Neil Tyson deGrasse said: "If the world were really going to end, cosmically, I'd let y'all know, and with plenty of time to do nothing." There you go.

### ***Pisces*** (Feb. 19-March 20)

Well, the madness is ending. At least the Full Moon in Taurus will provide a nice earthy element to the passionate high emotions of Scorpio. You may find that a little grounding is exactly what you need. If life suddenly throws you a few days of the "blahs", take a page from Winnie the Pooh—spend time with friends. Instead of looking for another thing to buy, call your folks or head out for a meet and greet. Bon!
