

The Sun is in Scorpio, Oct. 23- Nov. 21. For those born under this sign, extremes are common. This is the sign of death and rejuvenation. Superficial dealings won't do. During this period, Madame G suggests accessing your inner badass. Don't betray your dreams. Tackle the life you want with determination. Consider Scorpio's creed: "I desire." Go after it.

Aries (March 21-April 19)

If you find your dreams are wearing on you, remember this is when it's about to get good. Just when you feel like giving up, that's right about the time you'll succeed. Let that be a lesson to you. Instead of giving up and stepping away from the platform, reassess your plan. Take a step back and review. Does it require a few tweaks? Once you've tackled the challenge, keep going.

Taurus (April 20-May 20)

You may feel like you're heading down the wrong path and you might be. But, before you make any life altering decisions stop and think. There is more to this life than meets the eye. Are you really unfulfilled? Perhaps you're simply not stimulated at work anymore. This may require a career change or it may require tackling a few challenges or looking at them in a new way.

Gemini (May 21-June 20)

The air is charged with electricity and honey—it's delicious and inviting. You're rearing to go out and tackle the mental challenges ahead. You're also ready for a few Netflix marathons and some hot chocolate. This isn't a bad thing. In fact, channel your inner Scorpio. This is a sign that walks a fine line between comfort and laziness. Indulge in a little Hygge—it's good for the soul.

Cancer (June 21-July 22)

Lagom is the Swedish word for “just right.” This is the feeling that you’ve not gone too far in either extreme direction. This may feel counter intuitive to the Scorpio energy this month. But, it’s likely that you’ve gone too far and it’s now time to assess what is really going on. If you’re overspending perhaps you need to think about tackling your debt and any emotional hang-ups

Leo (July 23-Aug. 22)

What’s up pussy cat? The roar of the lion may overlook the subtle art of Scorpio who wears many masks. Your tendency to rush in and take over is a powerful tool, but is there not an art to saying less? Ask yourself, what’s at stake? What will you get out of this? It’s never too late to tackle the big questions and live as you’ve always wanted. Examine each thread carefully.

Virgo (Aug. 23-Sept. 22)

Virgos accept each challenge with sharp tenacity. You obsess over every detail. You have a warrior’s spirit and a true Scorpio respects your craftsmanship, even if they become exasperated. Instead of tackling challenges one-by-one, reflect on how they work together. Attempt to understand the larger picture in front of you and step back and smell the roses.

Libra (Sept. 23-Oct.22)

It’s all in a day’s work. You never know what is available to you until you get there. It sometimes seems like the end of the road. But, really you’re doing well. Sometimes you must tackle the challenges head on and sometimes you must take the side route. It’s within you to weigh out what is morally right and economical. They are not always at odds. Reflect.

Scorpio (Oct. 23-Nov. 21)

You're doing well. You've taken the high road and the low road. You've thought strategically and now you must plan. You recognize the importance of patience. You may toil away at an activity until the next challenge lies in wait ready for you to tackle it. You're ready to pounce. You've put it on pen and paper. You've even entered the class or read the book. You're ready.

Sagittarius (Nov. 22-Dec. 21)

And so it goes...You know not what lies ahead. You remain unafraid. This is a good attempt at tackling your inner fears. But, you can't wait around on the couch forever. You must make a giant leap for mankind and prove that you can. Do NOT do this for others. Do it for very selfish reasons. Do it so that you know you can. Believe in yourself because you make it happen.

Capricorn (Dec. 22-Jan. 19)

You have nothing to fear except fear itself. Consider Scorpio, they have three symbols to represent their growth: Scorpion, Eagle, and Phoenix. These are very different symbols with varying abilities. They are about transformation. The Phoenix rebuilds from the fire. You must dig deep within your soul and tackle the fear. Show it no mercy and live as if you were an eagle.

Aquarius (Jan. 20-Feb. 18)

What will you do from here on out? You will live as you were always meant to. This is the life where you build skyscrapers, travel near and far, and live larger than life itself. Don't wait for the next life to tackle your dreams—that time may never come. Don't wait for the kids to be ready, to have money, or happiness. Chose right now to be who've always meant to be.

Pisces (Feb. 19-March 20)

Madame G guide to the stars WEEK OF NOVEMBER 10

Written by Staff Reports

Friday, 10 November 2017 08:55

You're experiencing very real confusion. If someone doesn't respond the way you want them to, consider how you've been acting. Have you been perfectly reasonable? It's usually the people who believe they're reasonable, who are the real bullies. You are not made to live on this planet alone. You must allow people to behave as they will. If you stifle joy, they'll exit stage left.
