

Welcome Aquarius! Today the Sun enters the fixed air sign. This marks an exciting time. Expect the pull towards progressive, original, independent, and humanitarian causes. You may also expect some resistance from friends and family over confronting emotionally driven conversations. Madame G recommends patience and perseverance. Have fun and create!

Aries (March 21-April 19)

You have so much enthusiasm and energy. It's time to put it to good use. This is the time to try out new things and reach for the stars. Don't get trapped in the nitty-gritty. Follow your bliss. You have a limited time on this Earth (as do we all). Don't wait to find your dreams during retirement. Jump up and head out the door at full speed. Use your energy to your advantage.

Taurus (April 20-May 20)

Run don't walk out of our comfort zone. You may start to feel the urge to try something new. Don't hesitate! Keep an eye on the end zone and don't get lost in the minutia. You're capable of more than you think. In fact, instead of just dreaming about doing something extraordinary just do it! Each day try something that scares you a little even if your voice shakes. You can.

Gemini (May 21-June 20)

It's time for adventure. What have you always wanted to do? Perhaps you've always wanted to swim in the Mediterranean, take a safari, or flirt with a hot guy or girl in Hawaii. Whatever your dreams are, don't wait for the last second. It's time to live the life you've always wanted. You can't get everything you want unless you take time to try. Get going and take the first step.

Cancer (June 21-July 22)

Madame G suggests you take time to think this through. Your dreams can't wait. They deserve your attention and focus. If you don't take time to address your fears they'll remain forever. The only thing holding you back is your sense of dread. Have you ever thought that maybe the only person getting in your way is you? You're capable of more than you think. Do it!

Leo (July 23-Aug. 22)

Your heart is in the right place. Keep it up! Rest is always important. Consider learning a new skill. What have you always wanted to do? It's never too late to learn the guitar or how to tattoo. You're never too old or busy. If you don't do it now, you may never do it. Following your dreams is more important than not taking action. Now is the time to do as you've always wanted.

Virgo (Aug. 23-Sept. 22)

Are you living the dream? If you're not, then you certainly should. Don't take no for an answer. Keep your dreams in mind and look forward. You can accomplish anything if you want to. In this life, you can do anything you want to do (just don't give up). No matter how great or small your dreams are—keep going. This is the time to do it. Live large and have fun. Do it!

Libra (Sept. 23-Oct.22)

Don't show fear, dear Libra. Yes, it's a terrifying time and the world seems more unstable than ever. So, ask yourself—if the world should end tomorrow, are you doing what you want? If you're not, then take some action. Look towards your heroes and if you don't have one, find one. Start taking action over your life and don't wait for things to happen. You must act. Do it now.

Scorpio (Oct. 23-Nov. 21)

If at first you don't succeed, try, try, again. You can't blame others for your missteps or failures. You'll notice a drive towards innovation and increased creativity. It's important to think and plan, but there is a time when you must start. You can't wait for the perfect, time, day, or to feel ready. You'll never feel ready. You don't have to act totally impulsively, but do start.

Sagittarius (Nov. 22-Dec. 21)

You may wish for things to be different, but they'll never change unless you do. When you feel the push to take action just do it. When you feel like staying tucked into the corner of the house, try inching your way out. Every time you take a step it gets easier. Do your best. You don't have to be perfect to be good, happy, and successful. Just try it.

Capricorn (Dec. 22-Jan. 19)

What's in a name? It's easy to get stuck in the past and stagnate over the wrongs done to us. Instead, try letting go of one little thing each day. It doesn't have to be big, it can be the loser that cut you off in traffic, or that time your spouse was mean to you. Breathe in deeply and then gently say: "I forgive myself." Repeat that over and over. Eventually you'll forgive them too.

Aquarius (Jan. 20-Feb. 18)

Your time is here and you're feeling that little extra push. Don't ignore this. The Universe will not be kind to those that don't pick up the pen of innovation and creativity when offered. Heed the call and take action immediately. Consider changing up how you do everything. Streamline your life, so that you can take action easily. You'll find that this is easier than you think.

It's hard to sort through the big things, if you don't take care of the little things. Try something new that bothers you just a little every day. This may mean talking to the cute guy or girl at Starbucks or moving to a new city. You may feel yourself cringe away from the challenge, but think about how proud you'll be when you succeed. All it takes is a little extra effort. You got this.
