

Happy Valentine's Day! If you're single or just hate the silly 'Hallmark invention' just smile and congratulate yourself on not wasting money—on a half-naked baby holiday. If you're in love for the first time, or in second grade, bust out the red paper and glue. Madame G recommends that you take it all in stride. Why get mad? Your energy and time are precious. Peace and joy!

Aries (March 21-April 19)

What's up buttercup? Don't need to fret your life away. This is a dark and mysterious planet that is also beautiful and kind. Many dangers exist, and yet safe havens can also be found. Remember that every person carries a shadow and it's neither good nor bad. Shadows are light that have been blocked by an object and are unable to reveal their light. Step out of your own way.

Taurus (April 20-May 20)

Dear, dear, dear, what have you done? This is a nasty place to find yourself in. You might say, "you're a hot mess." That's perfectly acceptable. This first step is to admit that you have a problem. You might be your own problem. In fact, you might not allow yourself to do anything. If you're caught up in perfection—you'll lose the war before you begin. Ease up!

Gemini (May 21-June 20)

Will you, or won't you? If you haven't decided yet that's okay. You have your head and heart in a variety of places. At some point, you'll have to make a decision. But, stop asking if it's the right one. Is it the right one for you? That's all that matters. Consider this: "if it's not a HELL YES! Then it's a no." You don't need any more than that.

Cancer (June 21-July 22)

What will come next? Don't get stuck on the chicken or egg situation. It doesn't really matter. You need both, and can't have one without the other. Stop wasting time doubting yourself, or wondering if there is something better out there. Remember, the most important part is to keep moving forward. You don't need to have all the answers right now. Focus on one thing.

Leo (July 23-Aug. 22)

What will you think of next? You've got a million balls up in the air and that's the way you like it. Life would be boring if it were easy. There's nothing mysterious about routine. Yuck! Who needs it! You're a mover and shaker and you can't wait to conquer the mighty mountain and strap yourself into whatever contraption you've invented. You only live once.

Virgo (Aug. 23-Sept. 22)

How long is a mile? If you find yourself asking yourself, small but important questions, don't wait around—get back to school. There's a big wide world out there just ready to give you some answers. Some will be good and others will be way off the mark, but you could get a heck of a lot out of the equation. Consider your options. What's out there?

Libra (Sept. 23-Oct.22)

Where will you go from here? That's the answer you need. Don't hesitate to keep looking. You may think that you've learned all you can, but there is even more out there than you realize. The world is open to you and you're open to it. What's left over will shock and awe you. But, the first step is to put out one foot and start walking. All you need to do is take one step then another.

Scorpio (Oct. 23-Nov. 21)

Where is your heart? Are you living life to the fullest? If you're trapped in an office or in the middle a 9 to 5, don't despair. Deep worlds can be conquered and loved within the night shadows. The moon may offer solace and understanding. You may also find that the stars have greater beauty when you start asking the right questions of yourself and them.

Sagittarius (Nov. 22-Dec. 21)

Hope is only hope, if you allow it room to bloom. You can't squash it at every turn and expect it to take you to the best place. You must feed and water hope with the love and care of a newborn or plant. If you fail in your duty to honor the wisdom of such a pure form then you'll suffer the consequences. If this is you, don't lose hope. Take a breath and relax—it's okay to be happy.

Capricorn (Dec. 22-Jan. 19)

What did you do? If you enjoyed yourself this weekend, good for you. There's nothing like spending hard earned money on something that is unimaginably beautiful. You can thank your family for kindness and recognize that you always have something special when you imagine good things. The world is only as good as you give it so start giving out some love.

Aquarius (Jan. 20-Feb. 18)

What's up Doc? You don't have to be a wiley rabbit to discover your enemies are not as bright as they think they are. Never underestimate yourself and overestimate others. You're capable of so much more than you're letting yourself believe. You may be your worst enemy. If you find it difficult start writing down your thoughts and read them back. WOW!

Pisces (Feb. 19-March 20)

Madame G guide to the stars WEEK OF FEBRUary 9

What's holing you back? Don't let your past dramas and memories hold you back. Stop living in the closet! Whatever you're hiding it's going to come out eventually. Start designing the life that you want to live. You must live a life that you're proud of, not other people. Stop looking for approval and start taking action. Ask for forgiveness and not for permission.
