

Where are all the Pisces at? We'll encounter a First Quarter Moon on Feb. 23. This may induce further flights of fancy and an indecent amount of time reflecting on your failings. Remember you're really only as guilty as you feel. This doesn't mean you can act immorally, but take other's judgments with a grain of salt. Madame G recommends that you get out there and do some good.

Aries (March 21-April 19)

You're on a role dear Aries! This is looking good. Even if you don't get this job, girl (or boy), or take that vacation to Spain, you're really heading places. Everyone can see it. It's in the way you walk and talk. Confidence is oozing out of you—even if you don't feel it. Don't take life too seriously and remember to laugh long and hard with the ones you love. This life is short. Enjoy!

Taurus (April 20-May 20)

Your stomach is hurting. Is that a bad burrito or an ulcer? Don't take chances with your health. If you're worried, get it checked out. You solve nothing as an ostrich with your head in the sand. You can do more with knowledge. So, whatever is bothering you turn around and face it. There's no use in hiding from the truth. You're more than capable of handling anything. You're courage.

Gemini (May 21-June 20)

Life is short. Don't get stuck in a rut. But, it's important that you don't waste your life on FOMO (fear of missing out) either. This leads to flightiness and a lack of direction. You don't need to live bound to the Earth or shore. You can take a ship out to sea. However, in order to do this you must have a plan, a map, and some training. You're capable of sticking with it. Just do it.

Cancer (June 21-July 22)

It's okay that you've lost your way. It's okay that you never had a way to begin with. The purpose of life is learning about you and understanding what you like and don't like. We're more than blessed and more than lucky to live in a world that allows us to live our lives mostly undisturbed. You have a choice to reach high or low. Reach for what's best for you.

Leo (July 23-Aug. 22)

So what's up? You're heading out towards the world on a grand adventure. But, everything is an adventure when you're having fun. When you finally get the chance to do everything you want and live exactly how you've always wanted to live, what do you learn? You learn who you are. You learn what you love and value. This is a wonderful thing. Good luck!

Virgo (Aug. 23-Sept. 22)

Don't freeze up! You're capable of living the life of your dreams beyond the stars. But this takes courage, effort, and tenacity. You have this in abundance, but sometimes fear zaps your strength. The solution to understanding fear is not to ignore it. Feel your pain and anger. Feel the fear of failure and everything bad that could happen. Thank it for its wisdom and move forward.

Libra (Sept. 23-Oct.22)

What will you do next? You may think you're ready for the next step, but this may not be the right move. You need to think about this carefully before you jump forward. You can do more than you ever imagined, but no man (or woman) is an island. Trust in the judgment of others. They are just as capable, if not more so than you. You must learn to let go of control. You can do it.

Scorpio (Oct. 23-Nov. 21)

Don't let Pisces' pull down in emotional sensitivity. You may feel more upset than usual—this is to be expected. However, you can learn to control your emotions and the battery you assault your brain and heart with to a much greater degree. Relax. Learn to forgive yourself and breathe into hurt and out with the pain. You're getting there. This is all about skill development.

Sagittarius (Nov. 22-Dec. 21)

What will you do? Now is the time to act. You can't keep waiting for the moment to be right. No moment is ever right for anything. You must take the time to decide. You must make the effort to change the channel in your life. If you give up now, you rob yourself of a victory and the sense of accomplishment that you desire. Don't be a fool. Grow up.

Capricorn (Dec. 22-Jan. 19)

How will you be remembered? Perhaps you don't give this any thought and maybe you do. You don't need the adoration of millions to achieve what's right in this world. Do you treat your fellow human beings with respect? Reach out to your loved ones and let them know you care. Show love to your spouse and praise their ability to learn. Sing their praises. They'll sing yours.

Aquarius (Jan. 20-Feb. 18)

What's in a name? There are many shades of good and evil in this world. Sometimes these rules are judged by the ones who win wars and have the most money. But, you understand that this world is rich and varied. You're also aware that you can help more people with kindness than harshness. Don't get trapped into thinking there is only one good way. Understand your way.

Pisces (Feb. 19-March 20)

Don't give up Pisces. You're freaking out and acting out. This will never do. If you want people to respect you, show up in a way that people will respect. This may mean dressing a little more professionally or changing your hair color. You may also have to change how you treat others. You don't need to spend your time looking like you need something. Be your own friend.
