The New Moon or "Wishing Moon" emerges on March 17. So in addition to drinking green beer and clipping four leaf clovers, maybe make a little wish with your libations. This is a most excellent time for taking stock of the last month. Are you aligned with your goals? Are you living as you wish? Madame G suggests that you think this through now and take action.

Aries (March 21-April 19)

There's no time like the present. You can't keep waiting for others to see the good in you. You must own the good and bad in yourself, as must we all. You are not better or worse than anyone. Look deeply into your heart and dreams. What do you really want? It's okay to dream big and think outside the box. Show no fear. Stare down your enemy and be brave even with yourself.

Taurus (April 20-May 20)

This may feel like a curse, this burden for perfection, and it may be difficult, but you're up to the challenge. Stop arguing with yourself. Sometimes, you're going to fail. It feels awful. In fact, failing never gets better. But, you are better. You have infinite growth potential. Don't get lost in the mundane. Focus on what is important in the here and now and move out. You've got this.

Gemini (May 21-June 20)

Courage hurts. But, fear is debilitating. You may imagine yourself on the precipice of a great place. But, you don't know what you're doing or how you'll get there. You must use your brain. Don't trust blindly. You also can't remain standing waiting for the worst to happen. So, stop feeling sorry for yourself and get up and move around. You're capable of more than you know.

Cancer (June 21-July 22)

Love hurts and bites back. You're not easy either. You may think the fault belongs to your loved ones, but that's not true. In fact, you know it's not. It's very hard to admit when you've done wrong and it may hurt your pride. But, you'll survive. The rewards for compassion are limitless. You can be right and alone or forgive and be happy. The choice is yours.

Leo (July 23-Aug. 22)

What's up Doc? Do you have little bunnies eating up your yard? Perhaps you have little critters that enjoy the fruits of your labor. Instead of just exterminating those animals consider working with them. You may not be able to afford losing your crops all together, but that doesn't mean you can't try to get along with them. Maybe just think about it. Come on give it a try.

Virgo (Aug. 23-Sept. 22)

When you wish upon a star… Do you love Disney? If not that's okay (but what's wrong with you) and if you do, yay! Madame G admires your good taste. You may want to take this time and reevaluate your life. Now is the perfect opportunity to use some New Moon magic to make your dreams come true. Focus your intention towards taking care of those dreams.

Libra (Sept. 23-Oct.22)

The clock is ticking and you just don't know what to do. This is how life is and you can't change the facts. But, that doesn't mean that you can't take care of yourself and your family. If you have a team or just a bunch of kids, you're the leader of a group. You must work on communicating your feelings and thoughts with your team or miss out altogether.

Scorpio (Oct. 23-Nov. 21)

Stop wasting time. You've made your decision. You're bored and things are getting interesting. You don't want to spend the next 30 years of your life locked in a windowless closet. Get your hands dirty and get out there. Start taking action before you are lost. Now is the time to decide what you want. Only you can make the choice to stay or go, commit or leave.

Sagittarius (Nov. 22-Dec. 21)

What the hell are you doing? Do you even know? This may seem like a bright idea, inspired even, but is this what you truly want? You have commitments, but don't get lost in the petty dramas. You can do so much more than you ever imagined, if you just try to succeed. You don't need to do any more than simply try. You are capable. Good luck!

Capricorn (Dec. 22-Jan. 19)

The heart is a lonely hunter on this mortal coil. But, don't let that get you down. It's up to you to live the life you've always wanted. You can't expect others to help you. Who do you think helps them? God helps those who help themselves. So, stop asking what others can do for you. Stop asking how you can be helped. Instead start looking after yourself.

Aquarius (Jan. 20-Feb. 18)

You're well on the road to success. You just can't see the horizon. It might be all the smoke, steam, and puss oozing from your metaphorical wounds. Yes, you've worked hard to accomplish all you can. But, this is the part where you can't give up. You must look towards the future and start heading towards the horizon. You're almost there. GO!

Pisces (Feb. 19-March 20)

What’s in a name? You may think you’ve discovered the secret and you may have. Is it worth it? You need to focus on yourself and not others. Stop looking for approval and letting others treat you with contempt. At some point, you allow others to treat you as you do. This is not about tough love this is about respecting yourself before others can, you must.
