

What goes up must come down – but don't let that get you down. It's not up to you to decide what you can appreciate and what you should ignore. Life is all about the compromise of letting go and allowing new and better things into your life. Madame G recommends that you spend some time with yourself this week. Take care of yourself and more importantly, learn to forgive.

Aries (March 21-April 19)

You're heading down an interesting path. You don't know what's heading your way, but it's important to prepare yourself. Dwell in possibilities! Now is the time to let loose and learn all you can. You're not weak for trying new things or for wanting a different path than what's always been. You're unique and special. Don't get lost in your own mind. Live large. Live free.

Taurus (April 20-May 20)

Well, that's just how the story goes. Don't feel embarrassed when you change your mind. You're more than entitled to change whatever direction you're heading towards. This is the world that you can enjoy for the rest of your life. This is the life you must live. No one can live this life except for you. Make the choice to be all that you can be. Don't give up. You've got this!

Gemini (May 21-June 20)

Don't give up and never surrender. You may not appreciate the tag line of a cheesy film, but it fits the situation. You may not like where you are, but that doesn't mean you can't end up where you want to be. You have more power and strength than you realize. Don't betray your own heart. Don't live someone else's dream. Now is the time to be who you really are.

Cancer (June 21-July 22)

Fight, fight, fight all you want. In the end, you're only hurting yourself. Anger is a powerful emotion and it feels like strength. But that's just the thing: it feels like strength and it's not. It's a false sense of power. Look deep within your heart and consider your situation. You don't have to feel weak to apologize. In fact, the person who apologizes first possesses true strength. Try it.

Leo (July 23-Aug. 22)

So, you have a toothache. That's not a good sign. Maybe what you should consider is taking time out for yourself. What's the hurry? It's fun to finish projects and get a sense of completion from what you've accomplished. But there is more to life than work. Take a deep breath and think about what you'd like to do just for yourself. Maybe a long drive or a trip out of town? GO!

Virgo (Aug. 23-Sept. 22)

You've got a lot on your plate. But that's okay – that's the way you like it. Pursuing your dreams and trying new things is what you like. Variety is the spice of life. Don't take that away from yourself. Yes, there is always something new to do just around the corner, but don't lose sight of the horizon. You can do anything you want to do. Dream big and live bigger. GO, now!

Libra (Sept. 23-Oct.22)

You don't always know how to work with others. Your way is usually the best way. But that doesn't mean that others don't bring a fresh perspective or new inventions with them. Take time out for yourself and study how others do things. You might just get a surprise. Maybe that challenge you've been working towards isn't nearly as hard as you think.

Scorpio (Oct. 23-Nov. 21)

Stop wasting time. Just kidding! Do whatever you want. This is the time to really investigate what you want. Maybe you're on the right path for accomplishing everything that you need, if not, don't ignore your feelings. Take stock of what you feel. Don't be a martyr. You can accomplish more from pursuing your dreams and own life than trying to be what others want.

Sagittarius (Nov. 22-Dec. 21)

What will you do next? This is harder than you think. You can't just take the "whatever" attitude. You may not want to think too hard about your life choices. But you really should. They might not be all bad. In fact, this is how life works. Keep an open mind and live how you've always wanted to, and be who you've always longed to be. Good luck!

Capricorn (Dec. 22-Jan. 19)

You're a tough cookie, but that doesn't mean you don't have a soft center. You can do whatever you want and be who you want. But you should reach out. Don't be afraid of looking for the company of those who make a big impact in your life. Don't hold grudges and don't live in fear. Take action and dream. This is very important. Don't lose sight of your dreams.

Aquarius (Jan. 20-Feb. 18)

So you're heading out on a jet plane doing as you've always wanted to do. Don't look towards the future. Look right into the present moment and appreciate it. You can do whatever happens and live as you've always wanted. Don't try to be something you're not. You are more than you imagine. You're better than you think. You're also very capable of taking action.

Pisces (Feb. 19-March 20)

You're doing it! Great job! The universe was a little worried about you for a second. But you are more than capable of doing something great. Stop worrying about what the future will hold. Get down and start living. You can't predict the future or change the past. You can live exactly as you need to right now, in the here and now. Welcome!
