

Spring showers bring May flowers...The old saying may not apply to New Mexico, but the month of May marks the Flower Full Moon (aka Blessing Full Moon). This marks the time to come into your full power. Take stock of everything around you, what would you like to change or keep the same? Madame G wishes you well. Invoke your feminine power and stay strong.

Aries (March 21-April 19)

What would you like to become? Your life is a whirlwind of emotions and passions. There is so much to accomplish and finish. Sometimes, it feels as if your life is a series of unfortunate events. But, is this really true? The Buddha said that you don't really know if something is "good" or "bad." Life is a continual wheel of ebb and flow. Find your inner-self and keep going.

Taurus (April 20-May 20)

You're not immune. It's easier to believe the worst of any given situation or person than to feel vulnerable. This makes you feel a little weak. But, true strength is the heart reaching out to another with kindness when there is nothing left to gain. What kind of person do you want to be? You've only got one shot to live as you've always wanted.

Gemini (May 21-June 20)

What is your time really worth? When you think about what you want or how you want to live, you must focus on your time. You may have a ton of time, but it's very valuable. Time is the one thing that you can't ever get back. You can always get more money, more food, or new friends, but you can't your time back. Madame G recommends that you spend your time wisely.

Cancer (June 21-July 22)

This is an interesting time. Everything's going to shit. But, you're watching it like a live version of the Gladiators. You're only missing some popcorn and maybe nachos (depends on how evil you feel). Well, you have your hands full. Should you care? You have plenty of reasons not to get involved. But, in the end you know you will. Take a pitchfork or a hose (to put out fires).

Leo (July 23-Aug. 22)

You have a BIG smile and even bigger dreams. Life is full of potential just waiting to be explored. Tending to your dreams is just like tending a garden. Beautiful flowers open up with the sun and rain. They also respond to human voices. Look inward and glory in the sounds of nature. Tend to your dream gardens and take action. Never stop being the greatest you.

Virgo (Aug. 23-Sept. 22)

Unexpected tragedy can be a blessing. It won't feel good. And you'll be forced to look deep within yourself. When you do, you'll find that you were always you. Take comfort in this. You have everything you need in your heart to be happy at all times. Don't lose yourself to the consumerism or the relationship. Give up what no longer serves your well-being. Do good.

Libra (Sept. 23-Oct.22)

You can't escape it, you're human. Therefore, you're just as fallible as anyone else. You can't do your own thing alone. No one operates as a fully solitary individual. Even hermits require nature to make their lives livable and avoid starvation. Everything dies. Even plants die (and may feel pain) when they're consumed. This is your life. You are not alone. Remember that...

Scorpio (Oct. 23-Nov. 21)

What must be done? You have no idea how any of this will shake out. One thing you know, it's not worth getting worked up over it. You can't avoid bad feelings, disagreements, or conflict. You may feel backed into a corner, but you're entitled to feel happy and free as well. Just don't give up. You may not see the end in sight because the shore appears far away—keep going.

Sagittarius (Nov. 22-Dec. 21)

Don't give up. You're a flower looking for sun and rain. In order for your blossoms to take root, you must take care of yourself. You are more than capable of great things, but this life is always more than you've ever imagined. If you quit before the end, you will not accomplish what you've always needed to do or be who you wanted to become. Life is short. Don't give up.

Capricorn (Dec. 22-Jan. 19)

We don't always know if something is good or bad. At first, the worst thing in the world might turn out better than we thought. And the reverse is true. The Buddha said, if someone gives you a compliment or a criticism then you should respond: "You're partly right." If someone says, "you're great." Respond: "You're partly right." If they say: "You're shit." You say...

Aquarius (Jan. 20-Feb. 18)

What will you do? This is the time to open up and expand your mind, so that your ideas may blossom and bloom for all to see. It's scary to release your "darlings" to the world, but it's necessary. You must let them out of the closet so they can grow. Your life is not over. Who knows what they'll become, if you step away for a bit. This is your life. Live it. GO!

Pisces (Feb. 19-March 20)

The only real tragedy in this world is never stepping a foot outside your front door. It's hard to move forward. Sometimes, it's hard to try something new. But, you need to test yourself in order to understand yourself. Without testing who we are, how are we ever to know who we really are? You can do so much more than you ever imagined. Be brave. Fortune favors the bold.
