

What's happening next? On June 13, we'll experience the incredible planning power of the New Moon. This is an excellent time to start a new project or head in a new direction. You've done all the planning you need to, now is the time for action. In addition, Madame G recommends that you start preparing for the future you want. Creativity is a habit NOT a right. Get going.

Aries (March 21-April 19)

You're working towards the rest of your life. You must take it slow. There is plenty of time to figure it out. If you chose one career because it interests you that's great, but if you find that choice no longer suits you that's okay. Life is fluid like a river not a stagnant puddle from the leftover rains. You will encounter many things you hate and a few things you like. Try it all!

Taurus (April 20-May 20)

What will you do next? It's hard to know what's right or wrong. Hindsight is always 20/20. But, don't let that fool you. It's only the right decision when you find out the results (positive or negative). We tend to base our lives around whether we are right or wrong. But, in the end it doesn't really matter. A good decision can go wrong and sometimes you get lucky. Good luck!

Gemini (May 21-June 20)

This is the perfect time to think things through while you're taking action. You don't have to leave your brain behind. In fact, you can practice some lean strategy and be quick on your feet. You can also test your actions before you make it happen. You don't need to run out on your life. You could just consider taking up a few extra shifts or gigs. Enjoy yourself!

Cancer (June 21-July 22)

Life is like a box of chocolates, you never know what you're going to get. It is always better to say "yes" rather than "no" to new experiences or things. Rejoice in the variety of life, dear Cancer, accept new ideas and opinions. Continue brainstorming with others on your current endeavors. You can totally do this.

Leo (July 23-Aug. 22)

There is change on your horizon Leo. Leadership can be overwhelming and you might need a break from it. Confront old demons, we all have them. Listen to those younger than you for a refreshing new outlook. Get cracking!

Virgo (Aug. 23-Sept. 22)

Your neuroticism is overwhelming. Sometimes you just have to stop and focus. But, this may take more effort than your mind will currently allow. Instead, consider that life is all about the trial and error. You can live your life in a terrified state that you'll make a mistake and (gasp!) someone might learn you're human. But, that's not really a scary prospect. Go forth and fail!

Libra (Sept. 23-Oct.22)

Now is the time to go forth and conquer (your own emotions). It's never easy to not react to people, but have you thought that maybe they are trying NOT to react to you? Know thy self is an age old edict. You can accomplish more than you've ever imagined or dreamed. You must learn to trust those around you. They are very willing to help you get where you want. GO!

Scorpio (Oct. 23-Nov. 21)

Enjoy life with those who enjoy you. They may not always communicate their feelings well but they always are in adoration whether you realize or not. Follow your tried and true mantra of only using your powers for good, they did get you this far.

Sagittarius (Nov. 22-Dec. 21)

You can't give up before you begin. It may seem like a good idea to head out in the world by just "hoping" for the best. But, you know the way to glory is by putting in the time and challenging yourself. You can do this! Don't be afraid, your heart is in the right place. You don't need to live like a crazy person to be happy. But, you may have to plan a little. Try it.

Capricorn (Dec. 22-Jan. 19)

What will you do now? It's easy to place the blame at the feet of others. It's very hard to look within and ask yourself: what's wrong? You may not like the answer. You may get mad at yourself, your father, your brothers, or your children. But, you must ask this question and face your fears and anger. Once you do, they no longer own you. You can do this!

Aquarius (Jan. 20-Feb. 18)

You're not really afraid. This is all just very new and exciting. Have you ever tried to reprogram your mind? It seems crazy, at first. But, it has real potential. If you find, that you're dragging yourself down with sadness and anger don't give up. You're capable of so much more than you think. This is merely the beginning. You don't know what the end will look like. It's a journey.

Pisces (Feb. 19-March 20)

Hope is never lost. You may not fully understand all the nuances of the world, but you can

certainly understand the importance of moving forward. You don't need to hide behind a false bravado or made up words. Stand strong and look in the mirror. You can do this if you put your mind to it. Take a deep breath and hold on tight because it could get a little bumpy.
