

***The Sun enters Virgo this week on Aug. 23. You may notice the details. This is a benefit, for the “devil is in the details.” But, don’t forget to take a step back and scope the terrain. You’re also looking at an entire forest. Madame G recommends that you use common sense. Don’t get so caught up in the details that you’re putting on makeup while the house is on fire. Plan ahead!***

### **Aries** (March 21-April 19)

Ease up! You’re capable and strong. Don’t get so caught up in your screw ups that you stop looking and moving forward. The only real failure is not to try. It’s okay to get down on yourself, but only if you get up and dust yourself off. Look towards the future and remind yourself that you’re working hard for your future self, so you’re “now” self may get bruised.

### **Taurus** (April 20-May 20)

Whoa! You should step back and take a breath. This is the kind of thing that breaks your heart physically and mentally. Don’t get so lost in the details that you lose sight of your life, family, and goals. You’re better than this. Take a moment to give yourself some much needed self-care. This means more than spa treatments and cucumber water. Focus on your mental health.

### **Gemini** (May 21-June 20)

You’re a genius, or maybe you just have strokes of insight. If you find that you’ve come across something that you’ve always needed—you’re in luck! You’re a thoughtful person. This is great news. Now, you just need to put those amazing thoughts into practice. First, start by writing down your thoughts in a small notebook. Then figure out how you can put it into action. GO!

### **Cancer** (June 21-July 22)

What's holding you back? Nothing! It's all in your head. You can do this, if you really want to. Don't get lost in other people's drama. Focus on yourself and your family. Don't worry about what other people have going on. It's not important. The only thing that really matters is how you live your life. Live it well. You've got this.

### **Leo** (July 23-Aug. 22)

Dreaming of a better way? There is always a new adventure just around the corner. You can do all of this if you want. Choose your adventures wisely. Your energy may be extraordinary, but that doesn't mean it's limitless. Take everything in stride and keep trying. Do your best and share your talents and gifts with the world. You'll be so glad you did. Good luck!

### **Virgo** (Aug. 23-Sept. 22)

Hey Virgo! How's it going? The universe is on your side even if it doesn't always feel like it. Just keep trucking ahead and be grateful for what you do in the lives of others. Be grateful for what you have and keep sharing your talents with the world. You're capable of so much and your talents bring joy to the world. Keep trucking along.

### **Libra** (Sept. 23-Oct. 22)

Stop trying to balance the world on your head. You can do what you want, but you're responsible for more than just yourself. Let yourself free and show others your true self. You are capable of more than you think. You can do anything with the combined help of your community. No man or woman is an island. You need others. Show it. Be gracious.

### **Scorpio** (Oct. 23-Nov. 21)

Don't give up Scorpio! Now is the time to focus on the small details in your life. Make a conscious effort to read the details and spot the little mistakes. As you gain momentum you'll get faster. It's important to see the forest and you do. But, patience is a virtue. By reviewing and taking time to analyze the details you make room for bigger and better things. Keep trying!

### **Sagittarius** (Nov. 22-Dec. 21)

Keep calm and carry on! You can. You don't have to fly off the handle when you see the little things. You can appreciate the smaller things as they come and when they leave. Don't get so lost in the details that you lose sight of the shore, but don't get so focused on the shore that you let the boat sink. In that case, you could drown. In other words, use your head.

### **Capricorn** (Dec. 22-Jan. 19)

What's up pussycat? So, you're afraid, mad, or just a little crazy? That's okay. It happens to the best of us. But, don't get so caught up in the drama of your life that you lose sight of your actual life. Take note of the beauty around you. Don't wait for retirement to get it all together. Don't wait until you lose something or someone to be happy. Take time to enjoy your life.

### **Aquarius** (Jan. 20-Feb. 18)

In this world, you can be a doer or a watcher. It's fine to be both. But, if in your heart you're meant to be doing something—you'll regret not doing it. Instead, consider how you can make things in this world better. Are you adding value? What about your family's life? What about to your life? Keep one eye on the sail and another looking out for shore and pesky rocks.

### **Pisces** (Feb. 19-March 20)

Keep trying. No one will look out for you or have your best interest at heart except you. Don't get so caught up in other's drama that you can't look inward. You may see a lot of things that you don't like but in the end you need to face that shit. You can hide and hide, but one day you'll see all its ugliness. The longer you wait the harder it is. Do your best and take small steps.
