

***On April 12, the First Quarter Moon emerges and the Aries Sun brings forth strong confident energy. Enjoy this transition out of the ordinary and allow the creative force to rise up and through you. Now is the time to plant the seeds that will bloom later and bring you joy. This is a triumphant time. Madame G wishes you well and hopes that you learn whatever lessons are needed.***

### **Aries** (March 21-April 19)

Don't despair dear Aries, this too shall pass. Forward seeking energy is wonderful. But, at times you must slow down, focus on what needs changing, and reshape your possibilities. Don't give up. You're almost there. You may find anything you seek, if you take the time to look and work with yourself. You can't keep pushing off your troubles to another day. Sit calmly with them.

### **Taurus** (April 20-May 20)

Your heart is in the right place and you have found the place you were seeking. But, don't look for your self-worth in other things. The only things you need are within your own heart. You have the power to shape your own world and live well. Stop trying to control the feelings of others. You're not their conscience. Just be their friend.

### **Gemini** (May 21-June 20)

Keep working toward the goals you hope to accomplish, Gemini. Exciting opportunities could fall into your lap without much warning this week, so bring your 'A' game to everything you do, even impromptu meetings. As a Gemini, your superpower is being sincerely interested in other people's points of view.

***Cancer*** (June 21-July 22)

Dear Cancer, you can do this. It may feel like an insurmountable object is facing you, so push forward with strength and purpose. Maybe you got so focused on the big picture or the destination that you lost sight of the journey itself. Stay aligned with your vision and connected to the process. Jupiter, the teacher, has some big lessons for you.

***Leo*** (July 23-Aug. 22)

Keep sharing the joy in your heart dear Leo! You have so many talents and attributes. Give of yourself and discover what brings out your playful side. What recharges you could help you get better acquainted with yourself. Bask in the sum of all that you are.

***Virgo*** (Aug. 23-Sept. 22)

Live the life you've always wanted for yourself and spread the joy of happiness to those around you. If you recently moved or began a major renovation or redecoration project, you could probably use a chance to catch your breath and reassess. Give more focused attention to your family and inner circle, but don't let them steal precious "you" time.

***Libra*** (Sept. 23-Oct.22)

Life is all that is good and wonderful. Share your work with the world and rejoice in the feelings of others. You don't have to "feel" their pain in order to help them. Get outdoors more, and don't look at your phone! (Rather, look up at the sky and around at everything that's in bloom.) Get acupuncture, bodywork and extra sleep! Each of these is just one small shift, but together they will add up to a health-supportive lifestyle!

***Scorpio*** (Oct. 23-Nov. 21)

Sit still dear Scorpio. Now is the moment to sow seeds and plant ideas that will be reaped with time. Enjoy this unique process. Remember, you can't step into the same river twice. You can't have the same moment again. Breathe deeply and appreciate all that is around you. Live.

### ***Sagittarius*** (Nov. 22-Dec. 21)

Don't get caught up in sentimentality. It doesn't help those around you. Over the next four months, identify those areas where you stretched too far or revved too fast. There are only 24 hours in a day, Sag. And while you might have more energy and motivation than a six-pack of some of the other signs, you still need your sleep!

### ***Capricorn*** (Dec. 22-Jan. 19)

Dear Capricorn, enjoy life. Don't get caught up in the details of sadness. Share your love with others. Two of the most playful and creative planets, Venus and Neptune, link up in Pisces and your third house of socializing. Let your hair down and see what happens when you're not obsessing over work.

### ***Aquarius*** (Jan. 20-Feb. 18)

You must try to use that incredible mental strength to help rather than hurt those around you. You may not mean to use your energy against others, but sometimes when we're unaware of ourselves, we do just that. Give yourself a break. Give compassion to yourself first, and the rest will follow. Good luck!

### ***Pisces*** (Feb. 19-March 20)

Dear Pisces, you've been on an upswing, and enjoying the improved view from the top! Now

you will have four months to integrate the growth and lessons that have come along with it. If you got a little carried along by the momentum, this is your chance to slow your speed, check your GPS, and make course corrections if, and as necessary.
