

What's up pussycat? Don't let the world get you down. But, if you're feeling blue, don't feel pressured into wearing a fake smile. You're as entitled to a bad day as anyone. However, if your moods remain consistently bad, don't beat yourself up. You're doing the best you can. Madame G recommends that you look after mental health, as well as physical. You're loved!

Aries (March 21-April 19)

Don't worry be happy! It's a great song, but it's a little moralistic. If you don't feel happy you don't need to fake it. You have every right to be sad, disappointed, or angry. If these feelings last too long, you'll miss out on all of the beautiful things around you. So, give yourself a break and head outside. You're capable of so much more than you think.

Taurus (April 20-May 20)

Positive endeavors during this time include developing entrepreneurial projects behind the scenes or voyaging off for purposeful travel, such as for study, or to develop your spiritual gifts. When you're ready to invite in the new, let yourself visualize more than you think is possible. This lunar lift is all about aiming for the miraculous, not the mundane!

Gemini (May 21-June 20)

Life is full of surprises. Don't look at yourself in judgment. An old income stream may reopen something that helps you make money in your sleep. If you're sharing finances with a business or romantic partner, make sure you're on the same page. You might need to make some adjustments.

Cancer (June 21-July 22)

Dear Cancer, you've got a bright future. Don't let a few mishaps bring you down. Now is the time to do the best you can with what you have. You're more than capable of pursuing your dreams and reaching for the stars. You can catch the Milky Way, if you really, really want to. You just need to put the right action into play. You can do this.

Leo (July 23-Aug. 22)

You're passionate and bright. Don't lose faith in yourself. You are more than capable of reaching for dreams bigger than you ever thought possible. Don't get caught up in the details. Make a solid plan and go with it. You can make changes as you go along. Don't give up hope. Believe in yourself. You've got this covered.

Virgo (Aug. 23-Sept. 22)

Do the best you can with what you have. You're more than capable. If just as you're about to leap, old fears arise and find you ticking off all the reasons you "can't" swing out and take a risk, remember, it's too late to fly under the radar or avoid the competition now. Step into that leadership role that's calling your name.

Libra (Sept. 23-Oct.22)

Keep working toward your goals. Instead of enabling your inner circle to lean on you MORE, find constructive ways to empower them to act for themselves. Retrogrades can undo initiatives or change the rules of engagement, meaning this is NOT the best time to launch a huge renovation project or make a major move. Remember to share compassion with everyone around you. Good luck!

Scorpio (Oct. 23-Nov. 21)

Dear Scorpio, be good to yourself. You're more than capable of handling anything that life offers

you. Stop judging yourself so harshly. You must learn to accept the things you can't change and change the things that bother you. Learn to be a friend to yourself. Give yourself the credit you deserve. Take your licks and move on with your life.

Sagittarius (Nov. 22-Dec. 21)

Keep trying dear Sagittarius! Saturday's new moon in Taurus brings another motivating boost to take care of business. In the two weeks that follow, a job offer or new set of responsibilities could land in your lap. This will feel both exhilarating and overwhelming. Be patient with the process, as it could take up to six months to master the tasks and get everything solidly in place. Just keep trying and you'll accomplish more than you ever imagined.

Capricorn (Dec. 22-Jan. 19)

Dig deep into your soul. What would you like to accomplish? What makes you happy? Mull over your intentions and make sure they're taking you in the right direction. And don't be too quick to wipe the slate clean. Surely there are aspects of Capricorn 1.0 that are worth reviving and integrating into your new plans. This retrograde is a valuable time for researching, fortifying and doing the behind-the-scenes work to ensure that you have a strong structure in place that will support you. This is the life you want and this is the life you should live.

Aquarius (Jan. 20-Feb. 18)

Trust yourself and believe in who you are. Are there some skeletons rattling in your closet? Or have you buried some feelings so deeply, you don't remember where they are? These "shadow" emotions are hard to get at on your own. But if you don't deal with them, they will pursue you like hungry ghosts. You're capable of so much more than you could ever imagine or dream possible.
