

***The Sun is in Pisces from Feb. 19 - March 19. This opens doors of communication between lovers, friends, and family. And a New Moon emerges on Feb. 26. According to New Moon Magic by Molly Hall, The New Moon is a time to rest and “enfold into your real self, the timeless one.” Madame G suggests you rest before the big show and share your magic. Do it!***

### **Aries** (March 21-April 19)

What's your purpose? Everyone does something just a little better than everyone else. Why? Because no one is you, but you. You may find that there are those who are smarter, faster, and better, but they're not you. Your job is to seek and discover this part of yourself. You're unique and valuable. You'll dig deep. But, your worth is more obvious than you've ever imagined. GO!

### **Taurus** (April 20-May 20)

You're a superstar! You just don't know it yet. This is the perfect time to acknowledge your value. Remember, your worth doesn't depend on another's evaluation of you—it depends on you. Nobody can make you feel less, unless you allow it. You must sit down with yourself and have a serious heart-to-heart. What's in this for you? Don't be a victim of circumstance. Breathe!

### **Gemini** (May 21-June 20)

Your heart is willing, but your flesh is weak. You're a human being after all. Believe it or not, you can't change the world in an hour. And even you must stop and eat. You have other needs like sleep, social interaction, and rest. You can accomplish all you want, but you must care for yourself. Inspire others by leading change rather than forcing it. It's okay to be happy!

**Cancer** (June 21-July 22)

Love is for suckers! Especially those dopes who want things like happiness, fulfillment, and hope. Your sarcastic little heart knows all of this, but the need for revenge and possibly entertainment get in the way. Stop sabotaging yourself! STOP! You may need to show your tender little heart and it may get a little bruised. This too shall pass! Love yourself! Be kind!

**Leo** (July 23-Aug. 22)

Your heart is full and bright! Perhaps you've been enjoying the good company of a few, or the very good company of furry friends (i.e. dogs, cats, and squirrels). This may explain your good mood. It may also develop it feelings of relief as you enjoy your own company—a very healthy and reasonable person. Don't hide for too long, society needs your faith. Live it up!

**Virgo** (Aug. 23-Sept. 22)

Your heart is an open door. And your eyes are the window of the soul. Where is your heart these days? You may feel burdened and unsure. You may even feel like you're wasting life. In the end, life is a matter of small choices that add up over time. It's up to you whether those choices are good or bad, right or wrong, wasted or not. Enjoy the moment and live. It's all anyone has.

**Libra** (Sept. 23-Oct.22)

Your burdened? Maybe you're working too hard. Maybe you've headed out too many wrong doors and you're facing the truth. You have a few harsh critics, or you've let too many people down. Whatever the case, don't give up hope. This too shall pass and you're heading down the inevitable path. Happiness is a choice. Make the right decision. Be happy!

***Scorpio*** (Oct. 23-Nov. 21)

Don't worry! Be happy! Whatever happens—it happens for a reason. You can only get out stronger than when you went into the mix. Don't let the concerns of others bring you down. It's only a matter of time before you find the right place and people. Stay strong and confident in yourself. Don't the opinions of others bring you down. Take of yourself! Be AWESOME!

***Sagittarius*** (Nov. 22-Dec. 21)

You need fire in your belly. It's not enough to say you hate what you're doing, where you are, or who you're with. These are all things that can change and circumstances that require work. Don't hesitate forever because the moment will pass you by. What kind of life do you want to lead? You may find that you're closer than you think. But, you're not quite there yet. Do it, NOW!

***Capricorn*** (Dec. 22-Jan. 19)

So, life has you a little down. That is how it works. Your feelings go up and down. In some ways, it's just like the economy—it goes up and down. Those ups and downs can either lead you to paradise or a blackhole. The people who last and survive are the ones who can go up and down with swells without losing themselves to the current. You need to dig and think deeper.

***Aquarius*** (Jan. 20-Feb. 18)

What's in a name? What's in your name? Who are you? These are all rather confusing questions, with even more shocking answers. You can't define the world without first doing so for yourself. This is the way to understand everything around. You are after all a part of nature. You too are a thing that reacts to the world and environment around you. Who are you? Find out!

***Pisces*** (Feb. 19-March 20)

You may need a little family time, but don't worry if everyone seems too busy. They may just need some time or maybe they're evaluating a few things for themselves. It's up to you to bring it all together. Don't be too pushy or needy just show them where you are and when. It's all in the timing. Show your loved ones you care by giving them the gift of forgiveness! Smile!
