

***The Pink Full Moon rises on the last day that the Sun is in Aries. Be prepared to be amazed! This beautiful sight is the height of the Spring season. Enjoy the powerful energy it provides and look gratefully at your past and toward the future. You are the master of your own destiny. No one else can play a hand in your fate unless you let them. Listen to you heart and let it sing. Live free!***

**Aries** (March 21-April 19)

Dear Aries, as the Sun leaves your house take a moment to reflect back on what you've learned. Don't give up! Have faith in yourself and do your best. You're more than capable of handling everything that the world throws at you. The only one you need to fight and conquer is yourself. The world will embrace you when you've embraced yourself.

**Taurus** (April 20-May 20)

Don't give up dear Taurus! You have a beautiful heart and soul. The Sun is about to appear in your house and it's important to embrace what you can. Live the life of your dreams by teaching others how you do it. You're more than capable of being all that you can be. You have the power to teach others. Share this and give back more than you could ever receive and you'll receive more.

**Gemini** (May 21-June 20)

Life is the greatest teacher you'll ever meet, if you allow it to teach you what you need to learn. You may need to repeat the same lessons over and over, but now is the time to do more than you thought you could. This life is full of strange answers, and if you look deep, you'll find everything that you've been looking for. You just need to allow life to take you forward.

**Cancer** (June 21-July 22)

Be brave dear Cancer, don't fear the unknown - it's just you. No matter where the next turn takes you, believe that you'll find the way. Your heart and ambition are in the right place and if you keep doing what everyone else has done, you'll get what everyone else has. If you want something different, you'll have to think differently. Good luck!

**Leo** (July 23-Aug. 22)

Dear Leo, keep the smile bright and share when you feel like it. But allow yourself to rest. Everyone understands that you can't be happy all the time. Life is more than the BS we make up about it. Sometimes the reality is much greater than you could imagine. First make yourself a priority and then move on with your life. You can't keep hiding your light under a bushel.

**Virgo** (Aug. 23-Sept. 22)

Dear little Virgo, you have so many thoughts and dreams. Don't get lost in the plan. Don't make up excuses. Keep pushing toward the life that you want to lead. The time is NOW not later, NOW. Keep doing your best and push forward as well as you can.

**Libra** (Sept. 23-Oct.22)

Dear Libra, life is not passing you by. It's making the world available to you. Keep your head up and your shoulders back. You have lots to share and more to learn. Don't be afraid of the outcome. Do your best and share your creations with the world. Don't let go. Keep moving forward.

**Scorpio** (Oct. 23-Nov. 21)

Dear Scorpio, don't judge yourself. It's okay to admit mistakes and learn your lessons, but enough is enough. No more beating yourself up! The time for that is over. When are you going to be happy? When are you going to be all that you can be? Look toward the future and don't give up. You're more than capable. You'll survive and succeed. There is no other option. Face yourself.

***Sagittarius*** (Nov. 22-Dec. 21)

If you could tell your own story (and you can), where would you lead people? What message would you put out into the virtual world? Maybe it's time to write a new bio; share links to your work; replace a few photos. If you run your own business, this could be your cue to take a digital marketing workshop.

***Capricorn*** (Dec. 22-Jan. 19)

Sometimes your mouth runs away from you. So do your emotions. It's hard to control the runaway beasts in our minds. Don't get lost in the feelings. Feelings are not real. They may highlight danger or present themselves in a funny way as omens. But, at the end of the day, your feelings don't really matter and they're not always right. Keep your perspective in check.

***Aquarius*** (Jan. 20-Feb. 18)

Push yourself toward the future. What are you running from? This is the time to look to the future and do your best. You can't keep on challenging yourself and forgetting who you are. Live your best life now. You're more than capable, if you put your mind to it. Do your best and you'll succeed.

***Pisces*** (Feb. 19-March 20)
