

Enjoy a Last Quarter Moon on Aug. 23. You may notice some subtle energies picking up. Madame G recommends you finish any pending projects. You may also find that projects that were a source of stress automatically disappear. For that reason, look ahead and learn to appreciate each moment. Indulge in your senses this week.

Aries (March 21-April 19)

You're getting organized and that's great. Find the best method for yourself and move forward. Don't be afraid to ask for help from a friend or loved one who excels at organization. Learn from them and apply what works and discard the rest.

Taurus (April 20-May 20)

Over the next four weeks, you'll make a noteworthy impact in the public eye and even attract a buzz from the media. Start putting energy into your passion (or platform) and think about visual presentation. Enjoy your life and take time to pamper yourself.

Gemini (May 21-June 20)

Little decisions add up. If you feel overwhelmed don't lose heart. Now is the time to take care of yourself. There are many economical methods for this, take a walk outside, smell roses (even if you don't buy them) and smile. You'll figure it all out. Until then enjoy the sunshine.

Cancer (June 21-July 22)

Summer fun is steps away from your front door; in fact, it is so close you probably didn't see it. If new venues have opened up in your neighborhood, make it your mission to check out as many as you can. Keep your ear to the street for potential collaborators. A tag team effort could yield

a fresh wave of prosperity by fall.

Leo (July 23-Aug. 22)

Leo, the Sun is no longer in your house. But, the positive and bright energy remains. You'll accomplish more if you pick one thing and set it to rights. Complete it and put a stamp on it before you move on to the next one. Choose your projects wisely. Carefully plan your next move and set your goals.

Virgo (Aug. 23-Sept. 22)

Dear Virgo, the Sun is in your house this week. Enjoy the benefits of your strengthened Virgo energy and set things to rights. Don't forget to smile. With Venus here until September 14, self-love is the most important connection of all. Unplug from draining vampires and save your battery life for people who fill you up with electricity and excitement.

Libra (Sept. 23-Oct.22)

You may feel like enjoying a nice cup of tea today before dealing with all your responsibilities. You may be the designated guardian for your kids and their pets, but don't worry it won't last. Madame G recommends heading out on a vacation or adventure all by yourself. It may provide the clarity you need. Show kindness this week.

Scorpio (Oct. 23-Nov. 21)

You're ready for action, adventure, and whatever life throws at you. A quick vacation or mental health day did the trick and you're ready for anything now. If you haven't taken a day for yourself-it's best that you do. Whether it's snorkeling in the Atlantic or sipping orange mojitos on the beach reading a Ransom Rigg's novel-you're ready.

Sagittarius (Nov. 22-Dec. 21)

Someone recently said if you can't be positive, don't be negative. This means no matter what happens, you're not entitled to stab people, or yell at them. It may seem logical to have these psycho sessions in your head, but people will pick up on your hostility. Put that rage to work. Go for a run. Read a great book. Invent the next great thing.

Capricorn (Dec. 22-Jan. 19)

Cast a wider net, Capricorn, and you could open the doors to fortune over the coming four weeks. And if that means booking a flight or signing up for a conference on the opposite coast, so be it. Don't carry the burdens of the world by yourself. Talk with a wise friend, spiritual leader, or a therapist about your struggles. No one deserves to feel alone.

Aquarius (Jan. 20-Feb. 18)

It's a wise thing to learn by example. You're good at changing it up. Consider attending a seminar or class that pushes you toward your goals. You'll be so glad that you did. You're only incapable of changing the world if you think you are.

Pisces (Feb. 19-March 20)

You're down for some fun, but it's missing from each and every corner. Sometimes life hits these seemingly dull moments where nothing happens. The baby is growing well, but no longer an infant, or the job is no longer new-but not old. When you hit these mid-points consider taking time to reflect. Do your planning now and take aim at the future you want.
