

Hello New Moon! September is right around the corner and it's the perfect time to start any new hobbies, plans, or organize for the next 28 days. Use the New Moon energy to reinvigorate your life and put purpose to your thoughts and actions. Don't get caught up in the drudgery. Look where you are going and make a plan to improve it. You've got this. Madame G says enjoy!

Aries (March 21-April 19)

You don't get through life unscathed and no one gets out alive. The question is what's worth risking and what isn't. You can't pray that the heavy winds of time will never touch you. They will. A life devoid of risk is not worth very much either. There's reckless and boring. You don't need to be one or the other. Live your life and keep trying.

Taurus (April 20-May 20)

What are you waiting for? The going doesn't get easier. You'll never find the perfect moment, partner, or life experience. You have enough in you to get where you want to be. If you haven't heard lately - you're enough. You will always be enough. Stop seeking outside. Look within and you'll find peace.

Gemini (May 21-June 20)

The heart is a funny organ. It speaks of joy and sorrow. But, the truth is that the heart knows. Your head will mess up the equation. You'll find justification for misdeeds in yourself and others. Never look outside for the answer, for it is within you. Your heart knows this. Your heart has already decided. The rest of your mind, body, and soul must catch up. Make it so.

Cancer (June 21-July 22)

You're looking for something. Have you found it? Maybe you never will. But, the key is in looking deep and digging deeper. Don't waste time on frivolousness. You may experience a temporary happiness in fleeting pleasures. Such moments, will never lead to permanent bliss. In order to get there, you must let go of all expectations.

Leo (July 23-Aug. 22)

All this practical earth energy is a potent reminder that the "secret" to success is having strong objectives, a clear map to help you reach them and the unflagging determination to keep going until you do!

Virgo (Aug. 23-Sept. 22)

Your light shines brighter than the rest. But, even you may experience the rush of disappointment. This is to be expected. In those moments, you put your head down and breathe. Take a moment and then put your arms in a fighting stance and run. For you are capable of withstanding anything. You're more than capable.

Libra (Sept. 23-Oct.22)

Times are changing. You can't change this. You head from one moment to the next and expect the sun to rise and it does. So, you assume nothing else changes. Mortals must accept that all things change over time. Your friends will age and loved ones die. It's easier to blame than move on. But, in the end you must decide what to do for it's your life, to do with as you will. What's next?

Scorpio (Oct. 23-Nov. 21)

What's in your heart? You may think life is passing you by, but what better time to take on the world than now? Now is the perfect time to live the life you've always wanted and to be who

you've always imagined. It's in your best interest. There will never be a time like now. There will never be a greater time for living your life. The clock is ticking and all is finite. Act now.

Sagittarius (Nov. 22-Dec. 21)

Someone recently said if you can't be positive, don't be negative. This means no matter what happens, you're not entitled to stab people, or yell at them. It may seem logical to have these psycho sessions in your head, but people will pick up on your hostility. Put that rage to work. Go for a run. Read a great book. Invent the next great thing.

Capricorn (Dec. 22-Jan. 19)

Cast a wider net, Capricorn, and you could open the doors to fortune over the coming four weeks. And if that means booking a flight or signing up for a conference on the opposite coast, so be it. Don't carry the burdens of the world by yourself. Talk with a wise friend, spiritual leader, or a therapist about your struggles. No one deserves to feel alone.

Aquarius (Jan. 20-Feb. 18)

You may have faith in little, but you should have faith in yourself. There is little that you couldn't accomplish. It's up to you to take on the world, even if it is one silly little challenge at a time. You're more than capable. Better to live and try than do nothing.

Pisces (Feb. 19-March 20)

What lies at the center of hope? You may think it lies at the heart of promise - the promise for a better and brighter future. You may even believe that it signifies change. Hope is all of these things and more. Yet, hope is merely a belief, or faith, that what was true today can be better tomorrow. Share this faith with the world. Don't hide. Share the light.
