

***Mercury enters Gemini on June 12. Decisions will be made quickly this week, and they'll be well thought out. This is the time to pick up new projects, gain knowledge, and set a new path for yourself. Madame G suggests turning on the theme from Rocky, "Gonna Fly Now," and start training for your future.***

### **Aries** (March 21-April 19)

You've got some rest and fun time coming up! Good for you. But, don't forget to use your time wisely. It's time to get the education and training you need. This will get you to the next level. Stop procrastinating and invest in yourself. You're worth it. Even if you're tired or sad, push through. Celebrate your small successes. You've got this!

### **Taurus** (April 20-May 20)

Take the kids for a walk and bring the dog. You need to enjoy these beautiful days. You'll never get them back or take pleasure from staying stuck in an office, or a negative state of mind. These are the days of your life. These are the days of the people you love. We're here to connect with each other not stress over unpaid bills. Live now and smile!

### **Gemini** (May 21-June 20)

The Sun is in your sign this month, and your communicating like mad. It may all be in your head and potentially leading to madness, but you're communicating. People need your wisdom and carefully laid plans. Do humanity a favor—write your thoughts down in a journal, e-book, blog, or a street sign. We haven't developed telepathy yet, so use the tools you have.

### **Cancer** (June 21-July 22)

Dabbling is fun, but consider becoming a master of your trade. There's always new education you can use to enhance what you already know. You don't have to spend hundreds or thousands of dollars; simply buy a book or visit YouTube. If you can afford it, consider attending a seminar or workshop. Go wild! Do it in an exotic location. If you can't afford it now, begin planning to get there next year.

### **Leo** (July 23-Aug. 22)

Goals are driving you forward. But, you can't change everything. Focus on what you want. Push yourself towards your purpose and you'll gain more than you ever imagined. The time to achieve your dreams is now, not tomorrow, not yesterday, today. You deserve to live the life you've always wanted. Dream big!

### **Virgo** (Aug. 23-Sept. 22)

Learn a new skill and push yourself out of your comfort zone. If you're stuck in your job, the only person to blame is yourself. Start training for a new profession. If you can't afford to quit now, start planning your next move. Don't take the easy way out. Be brave! Remember that fortune favors the bold. Find a mentor in a job, career, or lifestyle you admire, and put your energy toward it. You'll be amazed by what you accomplish.

### **Libra** (Sept. 23-Oct.22)

This is the time to shine. Your beauty and grace are wondrous, but your humanity is your most beautiful asset. Help others. There is something likable in every person you meet. Do you have an annoying co-worker? Find something you can admire in them and focus on that. Work with everyone, and watch your happiness grow.

***Scorpio*** (Oct. 23-Nov. 21)

Hone your skills. Head back to the basics. You've been pushing too hard and too fast. Slow down and re-evaluate. Focus your attention on what you can change today, no matter how small. Imagine that every action you take is leading you toward excellence. Become a master of your skills and talents. Then take the world by storm.

***Sagittarius*** (Nov. 22-Dec. 21)

You need to take action now. Learn the skills, buy the book, and learn the language. Take a free personality evaluation test online and allow it to help you discover your path. Don't wait for the world to accommodate you — it won't. It's up to you to live the life you want. Be who you're meant to be. And do it now!

***Capricorn*** (Dec. 22-Jan. 19)

Don't get stuck in a rut. Allow yourself to practice self-care. This means more than manicures, massages, and fancy new things (although they help). You must protect your emotional state. You must develop your mind. You must learn to live with love and passion. If you push your loved ones away for too long, they may not be there when you're ready for them.

***Aquarius*** (Jan. 20-Feb. 18)

Breathe deep and enjoy the day. It's beautiful. Take the dog for a walk and read a delicious book. You should enjoy all that you have and more. Feel the great abundance that you have around you. Practice gratitude. Your life is beautiful. It's a powerful world and you're part of it. Live it!

***Pisces*** (Feb. 19-March 20)

Your joy is joy for others. You may not know where you're headed yet, but you may still live a life of purpose. Seek and you shall find. Look for the answers you need and do your best. Don't take your family for granted. Reconnect when possible. They might resist. Show love for your wife or husband. Kiss them deeply and do something that allows them to relax without having to ask for it. Enjoy!
