

Welcome to another look at some of the highlights arriving on 4K Ultra HD, Blu-ray and DVD. This is one of the busiest editions in recent memory. It contains big Hollywood productions, small B-movies and just about everything in between. So, if you can't make it out to the movies this week or need to stay indoors for a few days, be sure to give one of these titles a try!

BIG NEW RELEASES!

AIMEE: THE VISITOR: This low-budget science-fiction thriller from writer/producer/director Charles Band (Puppet Master, the Gingerdead Man series, the Evil Bong series) follows an introverted computer hacker who doesn't like being around people. After code breaking and entering a secret server, he discovers and communicates with an Artificial Intelligence Program taking the form of a beautiful woman. The lead finds himself being manipulated into committing horrible acts by the charismatic and charming software.

Few have seen this picture so far, but a few notices from online reviewers are available. They suggest the movie was definitely made on-the-cheap and doesn't provide as much B-movie fun as hoped for, but that the performances are competent and that it should entertain those who enjoy the filmmaker's other work.

It features Dallas Schaefer, Felix Merback and Faith West.
